PRODUCTS

PARKING BARRIER

Parking Gate Barrier is a device that secures the parking area from unauthorized access. Tacsll.com Dubai is the leading supplier of Gate barriers, Bollards, and Road Blockers in Dubai UAE.

Came Barrier

Delma Barrier

Magnetic Barrier

Elka Barrier

BFT Barrier

ROAD BLOCKERS

Road Blockers are designed to secure the premises by blocking the entire length of the driveway passage. The operations of Road Blockers are like automatic rising bollards but unlike the bollards, the road blockers block the entire road width. The road blocker is made with solid steel which is movable and connected to the housing by a hydraulic piston.

BOLLARDS

Bollard is a post that is either metallic or PVC and it is used to restrict unauthorized vehicles to a secured location. A bollard can be either fixed or automatic. A fixed bollard is always fixed to the ground either removable or non-removable. An automatic bollard rises to block the traffic and goes down to allow access.

Automatic bollards are of three types, electrical, pneumatic, and hydraulic. The electric and pneumatic bollards are used for less secure locations like villas, building apartments, road blockage, etc.

SPEED GATES

Speed Gates, also known as hidden gates, where the door is hidden inside the cabinet. Speed gates are used for high-security human access. They comprise two cabinets master and slave. There are two doors connected to each cabinet. The door is either made of plastic, glass, or metal. Each cabinet has a motor and a controller.
